Bitcoin Evolution

Bitcoin is a Peer-to-Peer Electronic Cash System, foresaw the need for a peer-to-peer online payment system that is self-governing, secure and limited in quantity. The Bitcoin network was launched on Jan. 3, 2009, with total supply of 21million and each Bitcoin priced at $0.0008. Today, Bitcoin maintains a stable trading value well above $60k after experiencing a gradual appreciation of 7,749,999,900% since its launch. While Bitcoin was initially perceived as a threat by traditional financial institutions, thirteen years of community support and a growing user base have made Bitcoin one of the most profitable investments for the internet age.
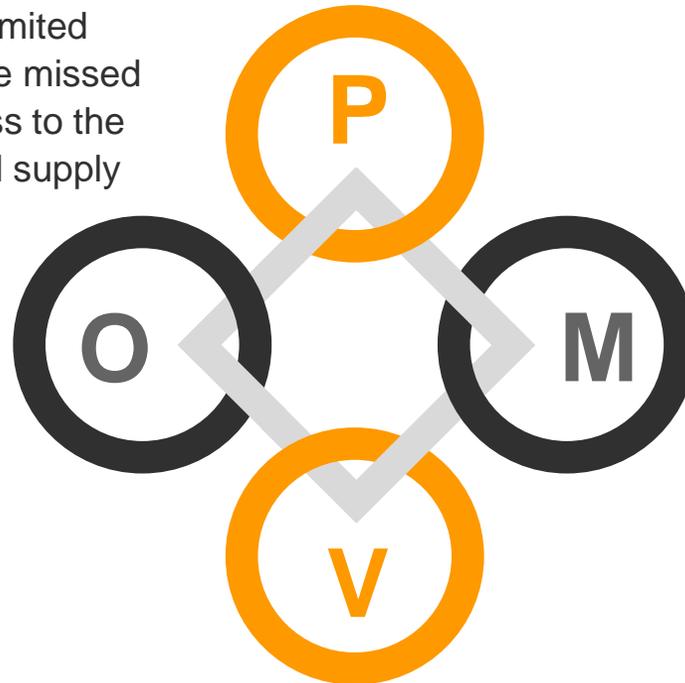

ArthroNation

Our Mission:

Build a cryptocurrency and smart contracts platform secured and ever operated in Africa by everyday people and for all transaction globally, utilize unused African resources, give freedom to ourselves and our father land without breaking the law .

Our Vision:

Build the world's most inclusive peer-to-peer marketplace, fueled by Arthrcoin; the Africa's most widely used cryptocurrency for everyday transaction as alternate to Africa's fiat currency.

What is The Goal Under Arthrocoin

We are developing an Hybrid Intelligence infrastructure for the efficient management of investors' capital in traditional financial and crypto-markets. The benefits of Hybrid Intelligence for an ecosystem is for the efficient and safe management of investors' capital by investors themselves or licensed managers. ARTHROCOIN (ATKt) is an opportunity for analysts to monetise their intellectual assets without risking their own funds. tools and data for making investment decisions under the conditions of market uncertainty. Control up-to-date analytics of the industry, expectations, opportunities, and market growth points. indices and ratings of crypto-assets under your 100% control.

Wallet:

Arthrocoin wallet is a decentralized wallet or account containing a safe amount of Arthrocoin to verify African and global transactions through the Arthro-blockchain connecting members of the ecosystem to the markets, services, finance, housing and resources.

Arthrocoin will be store in any bep20 compactible wallet such as Trust wallet, metamask wallet, mathwallet, etc.

These are the **most trusted and popular wallets to k**eeps your **Arthrocoin tokens 100% safe and** Can be **easily integrated** with any popular exchanges.

**ARTHROCOIN (ATKt) has a total supply of 100,000.**
It is intended to create high-priced coins to attract popularity!

UNIQUENESS Of African Bitcoin (ATKt)

- **ARTHROCOIN (ATKt) has a total supply of 100,000.** It is intended to create high-priced coins to attract popularity!

- Arthrokoin's unique characteristics can increase trust, security, transparency and bring other benefits to businesses in Africa.

- To solve intractable problems and improve longstanding cumbersome problem and practices in Africa.

- Creates an unalterable record of transactions with end-to-end encryption, which reduces fraud and unauthorized activity in Africa.

- **Freedom and individual control of assets and data**
Gives entities the ability to have total control of their assets and decide what digital data they want to share, with whom and for how long, with limits enforced by smart contracts.

- Innovation across multiple industries are exploring and implementing blockchain-based systems to solve intractable problems and improve long-standing cumbersome practices in Africa.

African Bitcoin

Fees.

Banks and companies charge large fees for facilitating transactions. These fees often disproportionately impact lower-income populations who have the fewest alternatives.

Censorship.

If a particular trusted intermediary decides that you should not be able to move your money, it can place restrictions on the movement of your money.

Permissioned.

The trusted intermediary serves as a gatekeeper who can arbitrarily prevent anybody from being part of the network.

Pseudonymous.

At a time when the issue of privacy is gaining greater urgency, these powerful gatekeepers can accidentally disclose -- or force you to disclose -- more financial information about yourself than you may want.

Bitcoin's

"peer-to-peer electronic cash system," launched in 2009 by an anonymous programmer (or group) Satoshi Nakamoto, was a watershed moment for the freedom of money. For the first time in history, people could securely exchange value, without requiring a third party or trusted intermediary.

Paying in Bitcoin meant that people and member of the community could pay each other directly, bypassing institutional fees, obstructions and intrusions. Bitcoin was truly a currency without boundaries, powering and connecting a new global economy.

WHY YOU SHOULD BUY, TRADE & HOLD ARTHROCOIN

Arthrocoin seeks to change the existing charity environment using the power of cryptocurrencies to fund Human Enhancement Technologies.
By this logic, arthrocoin would carry an exceptionally high value by 2023.
Purchasing a cryptocurrency with a limited supply is an effective way to profit from the future value. Investors should hold Arthrocoin because it's understandable that the importance of high demand and low supply with the volatility of crypto will make a good return in the future. Buy and Trade ARTHROCOIN on full Liquidity the most unique trading experience in the industry with a wide variety of assets, all in one platform.

How Arthrocoin Works

Get started by following simple steps.
First Synchronize BEP20 *ATKt* in your any smart wallet like below
(i) Metamask
**(ii) Trustwallet**
(iii) Mathwallet
(iv) Tockenpocket

➤ **Add Custom Token & Choose Smart chain Network**

➤ **Add Smart Contract address & Add Name: (ARTHROCOIN)**

➤ **Symbol *ATKt***

➤ **Decimals (9)**

Arthrocoin's Attention Marketplace

Arthrocoin's Attention Marketplace

Arthrocoin allows its members to pool their collective attention to create an attention market much more valuable than any individual's attention alone. The first application built on this layer will be a scarce social media channel currently hosted on the home screen of the application. You can think of the scarce social media channel as Instagram with one global post at a time. Pioneers can stake Arthrocoin to engage the attention of other members of the network, by sharing content (e.g., text, images, and videos) or asking questions that seek to tap into the collective wisdom of the community. On the Arthrocoin Network, everyone has the opportunity to be an influencer or to tap into the wisdom of the crowd. To date, Arthrocoin's Core Team has been using this channel to poll the community's opinion on design choices for Arthrocoin (e.g. the community voted on the design and colors of the Arthrocoin logo.) We have received many valuable responses and feedback from the community on the project.

Arthrocoin's Barter Marketplace

Build Your Personal Virtual Storefront In addition to contributing trust and attention to the Arthro Network, we expect Pioneers to be able to contribute their unique skills and services in the future. Arthrocoin's mobile application will also serve as a Point of Sales where Arthrocoin's members can offer their untapped goods and services via a "virtual storefront" to other members of the Arthro. For example, a member offer up an underutilized room in their apartment for rent to other members on the Arthro. In addition to real assets, members of the Arthro will also be able to offer skills and services via their virtual storefronts. For example, a member of the Arthro could offer their programming or design skills on the Arthro marketplace. Overtime, the value of Arthro will be supported by a growing basket of goods and services.

Arthro's Decentralized App Store - Lowering The Barrier Of Entry For Creators
The Arthro's shared currency, trust graph, and marketplace will be the soil for a broader ecosystem of decentralized applications. Today, anyone that wants to start an application needs to bootstrap its technical infrastructure and community from scratch. Arthro's decentralized applications store will allow Dapp developers to leverage Arthro's existing infrastructure as well as the shared resources of the community and users. Entrepreneurs and developers can propose new Dapps to the community with requests for access to the network's shared resources. Arthro will also build its Dapps with some degree of interoperability so that Dapps are able to reference data, assets, and processes in other decentralized applications.

THANK YOU
